

Atlas Aircraft Center, Inc.

115 Flightline Road
Portsmouth, NH 03801
(603) 501-7700

The Pilatus PC-12 is a plane with many rivals, but no equal.

Atlas Aircraft Center, Inc. is the authorized fleet service and support center for the PlaneSense® fractional fleet of Pilatus PC-12s, as well as an FAA approved repair station #CRS 5APR577Y. The AAC maintenance department is known throughout the United States as being thorough, precise and dedicated to providing quality workmanship.

We are looking to add to this top-rated team. Over the past five years, we have grown by 230%. Mechanics must have an Airframe and Power Plant license. Flexibility in work schedules and the ability to work overtime when needed is preferred. On the job training is provided by our experienced staff.

With our factory support, training and avionics experience ranging from Boeing heavy jets to corporate jets and turbo-props, our staff provides quick and reliable repairs and modifications to your aircraft. We are FAA certified to install and repair a full spectrum of avionics systems.

Join the Atlas Aircraft Center team and ride the wave of growth with us!
